

SEMINARIAN FORMATION PORTFOLIO

Secure, web-based seminarian profile

The Seminarian Formation Portfolio is a secure, web-based profile that provides data about a seminarian and tracks their progress from application through ordination. Authorization is given to different user groups to view, enter or edit information on a seminarian's profile, such as allowing only formators to view confidential notes yet allowing both formators and faculty to access faculty notes.

Using EMPOWER's Data Book, a seminarian profile is created and permissions are defined for who can view the data and what type of student data is to be displayed. Links can also be added to the profile screen as well as sub pages of the profile screen to navigate to documents, action logs, formator specific screens (Human Formation, Spiritual Formation, Intellectual Formation and Pastoral Formation) and/or any other desired web screens.

With all the formation information available online, formators and faculty can easily access the information and collaborate on the process. Even more importantly, the permissions functionality ensures that only the appropriate staff has access to the appropriate information.
