

MEDICAL SCHOOL ADMISSIONS

EMPOWER's medical school admission module can be used by itself as a supplement to your university system or as a front-end to EMPOWER Student Information System. It provides a number of functions, giving you the flexibility to implement with a single, integrated database structure.

FEATURES AND BENEFITS:

- AMCAS import interface with two-way status update
- AMCAS API data and document processing
- Administration/program-based configuration
 - User defined online application
 - Application cycle schedules, including applications open dates and deadlines
 - Administrative deadline override option
 - Required documents and waiver option at acceptance
 - Application fee and confirmation deposit requirements
 - Process definition: use screening, interview, and/or committee process
 - User defined: screeners and interviewer's forms and applicant scoring rubric
 - Automated event-based status update
- Display of applicant overview information in flexible, user-defined grid layout
- Define flexible user-defined presentation of applicant detail information
 - Administrators
 - Screeners
 - Interviewers
 - Decision committee
- Document management interface for all documents and completed forms
 - Request documents at various stages in the process, track receipts, and automate individualized reminders
- Assign primary and secondary screeners
 - Individually or in batch
 - Automated reminders to committee and applicants
- Scheduling
 - Cancel and reschedule interviews
 - Multiple individual interviews for each applicant
 - Decision committee meetings with automated reminders
- View committee results during the voting process
- Automated
 - Admissions status change per user configuration
 - Demographic update for underrepresented minorities
- Pre-matriculation process
- Upload and utilize user-defined supporting documents for links from EMPOWER
